

Ekola Flats Wind Energy Project

Location	Carbon County, Wyoming
Expected Capacity	250 Megawatts
Homes Powered	Approximately 76,000 homes
Jobs	10-20 full-time employees Approximately 250 construction jobs
Timeline	Construction in 2019-2020 Generation online in 2020

Economic Development & Community Benefits

- Local and state tax payments approximately \$14M through construction, annual property tax payments (estimated to be \$2.2M in year 2021); total tax payments of approximately \$82M over the project life.
- Approximately \$800,000-900,000 annually in Wyoming wind production tax revenues
- Estimated over \$395M in total project investment
- Advanced technology jobs & facilities bring new residents to eastern Carbon County
- 98-99% of the land remains in original use

#/Type of Wind Turbines Approximately 100 GE 2.5 megawatt nameplate capacity wind turbines (or similar)

- Permitting**
- Conditional Use Permit required by Carbon County
 - Size of project triggers Wyoming Industrial Siting Council (ISC) approval
 - Invenergy is supporting Rocky Mountain Power (PacifiCorp) in its 2020 Energy Vision Request for Proposal process for new renewable energy resources

- Roads**
- Planning to use US Highway 287/30 and Wyoming Highway 487 in the vicinity of the project

More About Invenergy

- North America's largest independent, privately held renewable energy provider
- Develops, owns and operates clean energy facilities in the United States, Canada, Latin America, Japan & Europe
- Developed more than 15,900 MW of clean energy projects in operation, in construction or contracted, including 77 wind, 12 solar, 10 natural gas & 6 advanced energy storage facilities
